Declaration regarding Conflict Minerals (EU regulation 2017/821)

Dear Customer.

We hereby confirm that Setiket A/S does not produce or supply any products containing conflict minerals (Tin, Tantalum, Tungsten, Gold) originating from the Democratic Republic of Congo (DRC) and its adjoining countries. Products containing PCB are not covered by this declaration.

The above declaration is based on currently available information retrieved and received from our suppliers.

We are aware that some customers may require detailed information or individual declaration for products produced and supplied by Setiket A/S in regard to this regulation.

The investigation of specific part numbers and issuing of individual declarations, e.g. CMRT, requires a lot of manual work and is very costly for us.

Due to this, the management has decided to charge a service-fee of DKK 750,00 / EUR 100,00 per part number investigated.

In case you want us to investigate specific part numbers, we kindly ask you to list these in an excel spreadsheet and forward this together with an authorized PO covering our service-fee to the email Sales@Setiket.com.

We trust that you understand our policy regarding this issue and are looking forward to our continued good cooperation in future.

Best regards

Setiket A/S
